

OUR COMMITMENT TO RECYCLING

At Whirlpool we take our environmental responsibilities very seriously, with our own factory dedicated to recycling and refurbishing old appliances. It's just one of our ways of trying to help take care of our environment as *many electrical items can be repaired or recycled saving natural resources.*

We will ensure that your product is treated and recycled in accordance with the WEEE regulations. Appliances that are not recycled could end up in landfill where hazardous substances can cause soil and water contamination.

OUR COLLECTION & RECYCLING SERVICES

Collection and Recycling: When you purchase an appliance with us you will be able to add these services as part of your order where we will then collect and recycle your old appliance. Please make sure your old appliance is disconnected and ready to be collected. If you have also added our installation service to your order then disconnecting your old appliance will be included as part of this service.

Free Recycling in Store: When you purchase your new appliance directly from us you can also return your old appliance to us at one of our outlet stores where we will recycle it for you . We'll also help you to recycle your small electronic equipment, up to a maximum size of 25cm in length on the equipment's longest edge.

Our store addresses are:

*Morley Way, Peterborough PE2 9JB
Follingsby Park, Gateshead, NE10 8YF
Station Road Yate, Bristol, BS37 5HR*

Whirlpool works in partnership with REPIC (our 'Producer Compliance Scheme') to ensure the electrical products we collect, or that are returned to us, are recycled responsibly. More information can be found at <http://repic.co.uk/consumers/>.
